Education

Swarna Bharathi Institute Of Science And Technology **Aug. 2024 – Aug 2028**
Bachelor of Science in Computer Science *Khammam, Telangana*

Relevant Coursework

- Data Structures
- Backend Development
- Algorithms Analysis
- GitHub
- Frontend Development
- Database Management
- Git

Experience

Upskill Campus **June 2025 – Present**
Full Stack Developer Intern *Remote*

- Developed a responsive full-stack blog application utilizing Java and the Spring Boot framework to handle secure user authentication, role-based access, and dynamic content delivery.
- Designed and implemented a relational database schema using MySQL/PostgreSQL to efficiently store, update, and manage user profiles, blog posts, comments, and media assets.
- Created interactive frontend user interfaces using HTML, CSS, and JavaScript/React, integrating them seamlessly with backend RESTful APIs for real-time data retrieval.
- Utilized Maven for dependency management and Git for version control, ensuring smooth collaborative workflows and organized code deployments.

Projects

Full Stack Blog Application | *React, Node.js, Express.js, MySQL, REST APIs* **January 2025**

- Developed a responsive full-stack blogging platform featuring user authentication and secure session management.
- Designed and implemented a relational MySQL database schema to efficiently store user Blog Data.
- Engineered robust RESTful API endpoints using Express.js to handle full CRUD operations for managing blog content.

Domain Availability Checker | *Python, Flask, GoDaddy API, WHOIS API* **Recent**

- Built a web application that allows users to instantly search and verify domain name availability across extensions.
- Integrated third-party GoDaddy and WHOIS APIs to fetch real-time registration data and domain status details.
- Developed a clean, lightweight Python Flask backend to process domain queries and handle API responses efficiently.

Personal Portfolio Website | *React, HTML5, CSS3, JavaScript* **Recent**

- Designed and deployed a modern, mobile-responsive portfolio website to showcase professional engineering projects.
- Utilized component-based architecture in React to build clean, reusable UI elements and optimized page load times.
- Implemented custom responsive layouts using CSS Media Queries and Flexbox for seamless cross-device compatibility.

Real-Time Weather Application | *JavaScript, HTML5, CSS3, OpenWeather API* **Recent**

- Created an interactive frontend application that provides real-time weather forecasts based on user-inputted locations.
- Integrated the OpenWeatherMap API using async/await fetch functions to dynamically parse and render live weather data.
- Applied modern UI/UX design patterns with vanilla CSS to present dynamic data visualizations like changing weather icons.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL
Developer Tools: VS Code, Eclipse, Dev Tools, Google Cloud Platform
Technologies/Frameworks: React, Node.js, Express.js, Linux, Jenkins, GitHub, JUnit, WordPress
